

# Project

**Name: Rashmit Chandubhai Bhanderi**

**Id: 219682680**

- The website you are currently viewing is my personal portfolio.
- The website is divided into five distinct sections.
- To create this website, I used several programming languages, including HTML, CSS as well as bootstrap, JavaScript, PHP, and MySQL/Database.
- I incorporated the CSS into the design.
- I have also used aos for animations in the about us section and skills sections.

- `<link href="https://unpkg.com/aos@2.3.1/dist/aos.css" rel="stylesheet">`

- I have animated the skills sections to show the skills one by one and the about section as well.

# Home

- In my home page, first you can see my profile picture and summary about me.
- When we scroll the page the navbar color changes I have used JavaScript to do that.

```
• data-aos="fade-down"  
• data-aos="zoom-out-left"  
• data-aos="zoom-out-right"
```

# Skills

- When you go to the skills page, you can see my skills in different computer languages.
- I have used JavaScript to make the process bar.

```
• (function() {  
•  
•  
•     var SkillsBar = function(bars) {  
•         this.bars = document.querySelectorAll(bars);  
•         if (this.bars.length > 0) {  
•             this.init();  
•         }  
•     };  
•  
•  
•     SkillsBar.prototype = {  
•         init: function() {  
•             var self = this;  
•             self.index = -1;  
•             self.timer = setTimeout(function() {  
•                 self.action();  
•             }, 500);  
•         }  
•     };  
• }());
```

```

•
•
•   },
•   select: function(n) {
•       var self = this,
•       bar = self.bars[n];
•
•
•       if (bar) {
•           var width = bar.parentNode.dataset.percent;
•
•
•           bar.style.width = width;
•           bar.parentNode.classList.add("complete");
•       }
•   },
•   action: function() {
•       var self = this;
•       self.index++;
•       if (self.index == self.bars.length) {
•           clearTimeout(self.timer);
•       } else {
•           self.select(self.index);
•       }
•
•
•       setTimeout(function() {
•           self.action();
•       }, 500);
•   }
• };
•
•   window.SkillsBar = SkillsBar;
•
•   })();

```

```

•
• (function() {
•     document.addEventListener("DOMContentLoaded", function() {
•         var skills = new SkillsBar(".skillbar-bar");
•     });
• })();

```

## Contact me

- I made this table with the help of form, textarea, input etc.
- When you write your details and your message, then click on the sent button, the message is sent to me, and you can see the message in database.

Showing rows 0 - 7 (8 total, Query took 0.0007 seconds.)

SELECT \* FROM `contact\_me`
